Calf Holster Instructions

The calf holster is great for carrying many forms of gear like 30-round Glock magazines as well as mounting the fixed blade.

To mount the knife sheath to the holster, remove the belt latch from the sheath. Use two of the screws and nuts from the belt latch to mount the sheath through the holes on the calf holster.

Position the holster facing the inside of the leg. For additional comfort wear a high or knee sock under your calf holster.

Wrap the top straps of the holster underneath the knee.

Wrap and strap the middle straps.

Wrap and strap the bottom straps.

Pull pants leg down and comfortably cover.

Zip downwards and out for quick access.

Important Consumer Information

These warnings must be read and understood before using American Tactical Apparel products. ALL firearms are potentially dangerous. Firearms should be kept out of reach of children. Use of a handgun under any conditions may be dangerous. Serious injury or death could occur without proper training of the safe handling of firearms by an accredited firearms safety course. No person should handle any firearms unless such person has successfully completed an accredited firearms safety program. Great care should be used when handling, storing, or transporting firearms or when placing or removing a handgun from a holster. Never place a loaded handgun in a holster without first testing in an unloaded condition for proper fit and retention of the handgun in the holster. It is the user’s responsibility to exercise extreme caution when handling or carrying any handgun, and to assume at all times that the gun is loaded. The user must keep the finger and any foreign object off the trigger and outside the trigger guard when drawing or re-holstering. Never cock a weapon while inside the holster. For information on how to handle and carry your particular firearm, please refer to your firearms manufacturers’ safety and instruction manual. American Tactical Apparel holsters are designed to fit factory equipped handguns. Any modifications to the handgun may cause improper holster fit and an accidental discharge. Any alteration of the holster or misuse of the holster may render an unsafe condition. It is also the user’s responsibility to personally check the holster for handgun compatibility, wear and tear, fit, and function. Should any American Tactical Apparel product become worn, loose, broken, defective or ill-fitting, cease use immediately.
